* SELECTED FOR BIRMINGHAM - Trees in this list are proven to be easy-to-grow, free of injurious insect and disease pests, heat-tolerant and drought-tolerant. Natives in this list add to local biodiversity; most will live for several human generations; exotics in this list are not known to be invasive. All plants benefit from supplemental water until established.

** CODE: L = >50', >100 years; S = <50', <100 years; N= SE native; E=exotic
